- 11 Madiba P2E GAMES
- 12-13 Key Notes
- 14 ROADMAP
- 15 The Future of Madiba Token

INTRODUCTION

It is always impossible until it is done - Nelson Mandela (Madiba)

Freedom to create wealth and value is one of the most vital parts of a thriving community, Inspired by one of the greatest legends of Africa, Nelson Mandela, who always championed freedom, education, and equality, we are building a community centered on these set of values.

Our mission is to create a community that enables everyone to rise in wealth and value through a community-driven system that gives an equal chance for all to grow and achieve their goals.

With the \$Diba Token, Madiba Stake, Madiba Swap, Madiba P2E Gamezone, Madiba NFT Liquidity Pool and Collections, Madiba DAO, this is how we plan to create a system of wealth, value and equality for all members of our community.

THE VISION

Creating a community and a Token, that's driven by our collective value is not enough for sustainability hence, we are building utilities that will serve as the backbone for the constant growth of the value of our community and this project.

These utilities will be broken down into five Products, MadibaStake and MadibaSwap will be live from the inception of this project. The multiple Utility will drive the massive adoption of \$DIBA token. Thereby, increasing its value greatly. The vision is to create an intrinsic connection between the Madiba community, the Madiba Utilities, the Blockchain ecosystem and the world at large, in a way that wealth is created, all community members are equal and absolute freedom is given to all.

- Madiba Stake and Swap
- The Madiba NFT Collection
- MadibaP2E Gamezone
- The Madiba DAO
- The Madiba NFT liquidity pool

THE MADIBA TOKEN \$DIBA

The Madiba token \$DIBA will be built on the Binance Smart Chain and is the native currency, to be used across the Madiba products as the basis of all kind of interactions and transactions, we collectively chose this blockchain as it is one of the best and popular blockchains in the world that permit an easy integration and development of new projects. It is also good for scalability.

DIBANOMICS

TOTAL SUPPLY: 1,000,000,000 (ONE BILLION \$DIBA)

30,000,000 (3%)

Team

(Locked and vested within the smart contract)

50,000,000 (5%)

Private Sale

175,000,000 (17.5%)

Liquidity

495,000,000 (49.5%)

Staking & Rewards

(Locked and vested within the smart contract)

250,000,000 (25%)

Presale

TAXES

Buy Tax (9%)

- Dev & Marketing 6%
- Liquidity 3%

Sell Tax (9%)

- Dev & Marketing 6%
- Liquidity 3%

Sales

- Private Sale: 50% Token more than Public sale.

Public Sale:

- To be determined when Fair Launch ends.
- Pancakeswap: Same price as Public sale.

DIBA SWAP

Madiba Swap will serve as our flagship product for value creation for our members and others who wish to use its services. It will be a DEX platform built on the Binance Smart Chain with features like staking and farming with very juicy APR rates for holders of the \$DIBA token. This platform will host any external project token of the members of our community, as it will help their projects get liquidity and distribution faster.

DIBA STAKE

Madiba Stake is a simple staking platform that offers flexible Single Tier System of staking the \$DIBA Token and other external tokens that will be listed on our staking platform.

The Madiba 3X Tier which is the only available tier, offers 300% reward on \$DIBA tokens staked for the period of 60 days.

Staked tokens plus the amount of reward accumulated at a certain period within the 60 days, can be claimed without penalty. That is, staked tokens don't have to wait the period of 60 days before you can unstake your tokens with the accumulated reward.

External Tokens Listed on the Madiba Stake platform, are subjected to the project owners' choice of APY, Staking Duration and Flexibility.

MADIBA THE NFT COLLECTION

Art is a strong part of our heritage as a people and we love them.

NFTs have become one of the best ways to optimize their value, The Madiba project has partnered with Klynox labs the creators of the Infamous Hall of Royals project to create a 1000 PFP collection of art that portrays our inspiration for this project, Nelson Mandela in very glorious form.

These PFPs will also help drive the marketing of the project better and provide a strong image and representation of our community in public and on social media as members can use them as their profile pictures across different social media platforms

The collection will be created on the BSC and posses a burn function that can convert each NFT to \$DIBA tokens depending on their rarity.

We will also set aside funds to encourage and supports other artists and creators who want to develop projects in our community

DIBA DAO

Our Community is the backbone of this project and so creating an authentic way for each member to participate and propose new idea, projects and to vote and arrive at a consensus on several decisions is very key to this project.

Therefore we will be building a DAO system that allows holders of \$DIBA and members to vote and propose new projects and ideas to drive our community further and create more value.

MADIBA NFT LIQUIDITY

Though NFTs are revolutionizing art, they are still illiquid assets and so to solve that we are creating an NFT liquidity pool that allows members to sell their NFTs from several collections at floor price in an instant and also buy any NFT in the pool at floor price regardless of the rarity trait of said NFT.

The pool will also have a burn function for NFTs created by the Madiba project where members can burn their NFTs for \$DIBA tokens

MADIBA P2E GAMES

GameFi and the metaverse are rapidly creating an evolution in the world of gaming today, with Play to Earn games changing the narrative around games.

We will be creating a Game zone driven by Peer to Peer and online multiplayer style games that players can participate and win substantial amounts of \$DIBA in Prizes, this Game zone will also serve as a launchpad for game creators in the community and some funds will be set aside to fund and attract game creators and developers to the community.

We will partner with several gaming startups and labs and we will be launching two games shortly after Token launch, Diamond Rush and Traders lotto, these games are lots of fun and have an interesting reward system embedded in them.

KEY NOTES

FUNCTION OF THE DEV & MARKETING WALLET

- Employed MODS Salary payment.
- Marketing & Promotions.
- Manual \$Diba buy-back and burn at a certain milestone. Subject to the community's unanimous decision via the Madiba DAO

PUBLIC PRESALE PROCEED

- 75% of total raised BNB goes to pancakeswap as liquidity,
Paired against the provided liquidity tokens (175,000,000 DIBA)
- 25% of total raised BNB will be spent on:
 - Products development and Massive marketing.
 - Dev team expenses refund.
 - The 2% Presale token fee buy-back from Pinksale

KEY NOTES

WHALE AND DUMP CONTROL

- The 100% private sales reward to be released after public sale fair launch on Pinksale.
- Fair Launch buying for all public sale buyer, equal footing.
- Team and Reward Token Lock and Vesting coded into the smart contract.
- 2% presale fee token paid to Pinksale, buyback before listing

ROADMAP

PHASE 1 JAN 2022

- Madiba Platform Analysis and planning
- Whitepaper creation and Roadmap development

PHASE 3 MARCH 2022

- Madiba Staking and Madiba Swap Dapp
- Strategic Partnership
- Massive Marketing (Stage one)
- Coinmarketcap and Coingecko Listing
- Madiba NFT Collection Release
- Goya Menor NFT Collection Release
- Massive Marketing (Stage two)
- Nomics Listing

PHASE 2 FEB 2022

- Smart Contract Deployment (BEP-20)
- Social Platforms creation
- Website development
- Private Sales
- Audit by Techrate
- Testnet Pre-sale Listing on Pinksale
- KYC with Pinksale
- Pre-sale on Pinksale
- DeFi Listing: Pancakeswap

PHASE 4 MAY 2022

- Madiba DAO
- CEX Listing: Hotbit
- Madiba P2E Gamezone
- Continuous Progress

THE FUTURE OF MADIBA TOKEN

Although we have created a Roadmap to guide this project in the early phases, the future of the Madiba Project lies in the hands of the Madiba community whose unanimously voted decisions through the Madiba DAO, will count greatly to the growth of the project. Collectively, We will create several roadmaps to determine our best path moving forward.
